

We all have different shades of skin

We all have skin on the
outside of our bodies.

Skin comes in different colors.

All skin colors are beautiful!

Shades of skin can be light or dark, or anywhere in between.

Hair comes in a lot of different colors too!

Even though we all have different colors of skin and hair, we are all the same on the inside.

We all have a heart, a brain, a stomach and bones inside our bodies.

No matter what shade our skin is, we all like to play and have fun.

Having different skin colors is beautiful! If we all looked the same, the world would be a boring place to live!
